

Thank you for your feedback!

Last month, everyone surveyed told us they were satisfied with their visit. 55% were very satisfied.

There was some concern about availability of appointments, so we have decided to open each Saturday morning for examinations for people that work during the week.

There was also some concern over the cost of some treatments. Please remember that this practice offers both private and NHS treatments, so you have a choice over how much you pay. NHS fees are set by the government are the same across the country.

Everyone felt our staff are helpful and courteous, and try to help with any questions asked.

Thank you for helping us improve our service!
